

Problem #1: Magical Parameters

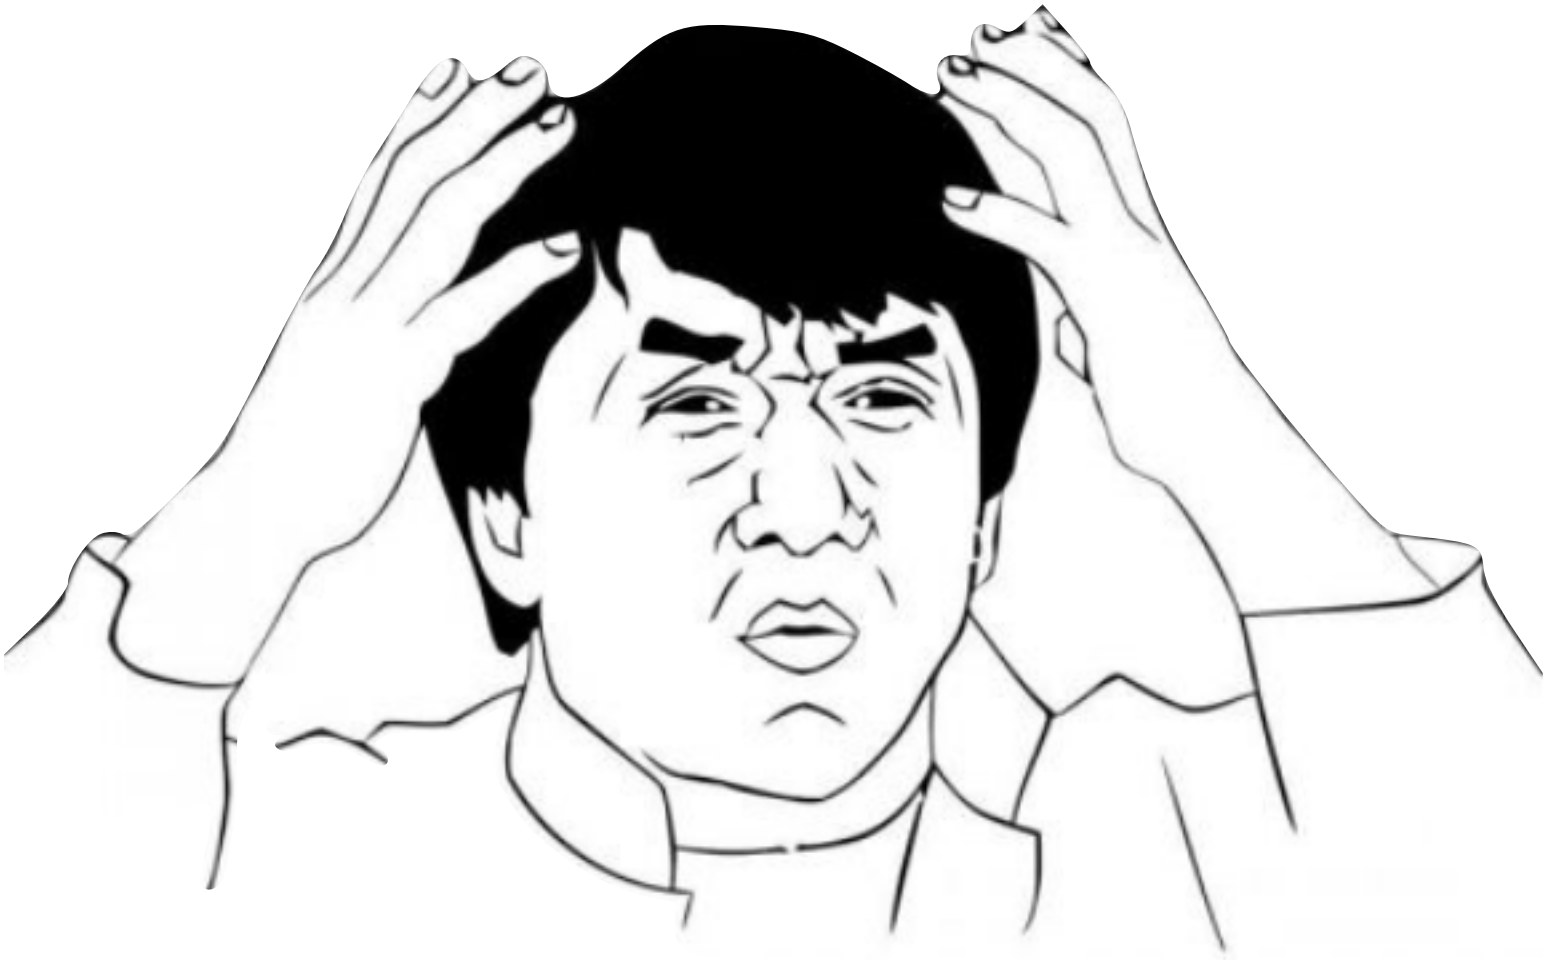

• Ex: '#*@post//echo/<msg>'

• Receives path parameters

• Can also receive query parameter 'msg'!

• Can also receive a **body** parameter 'msg'!

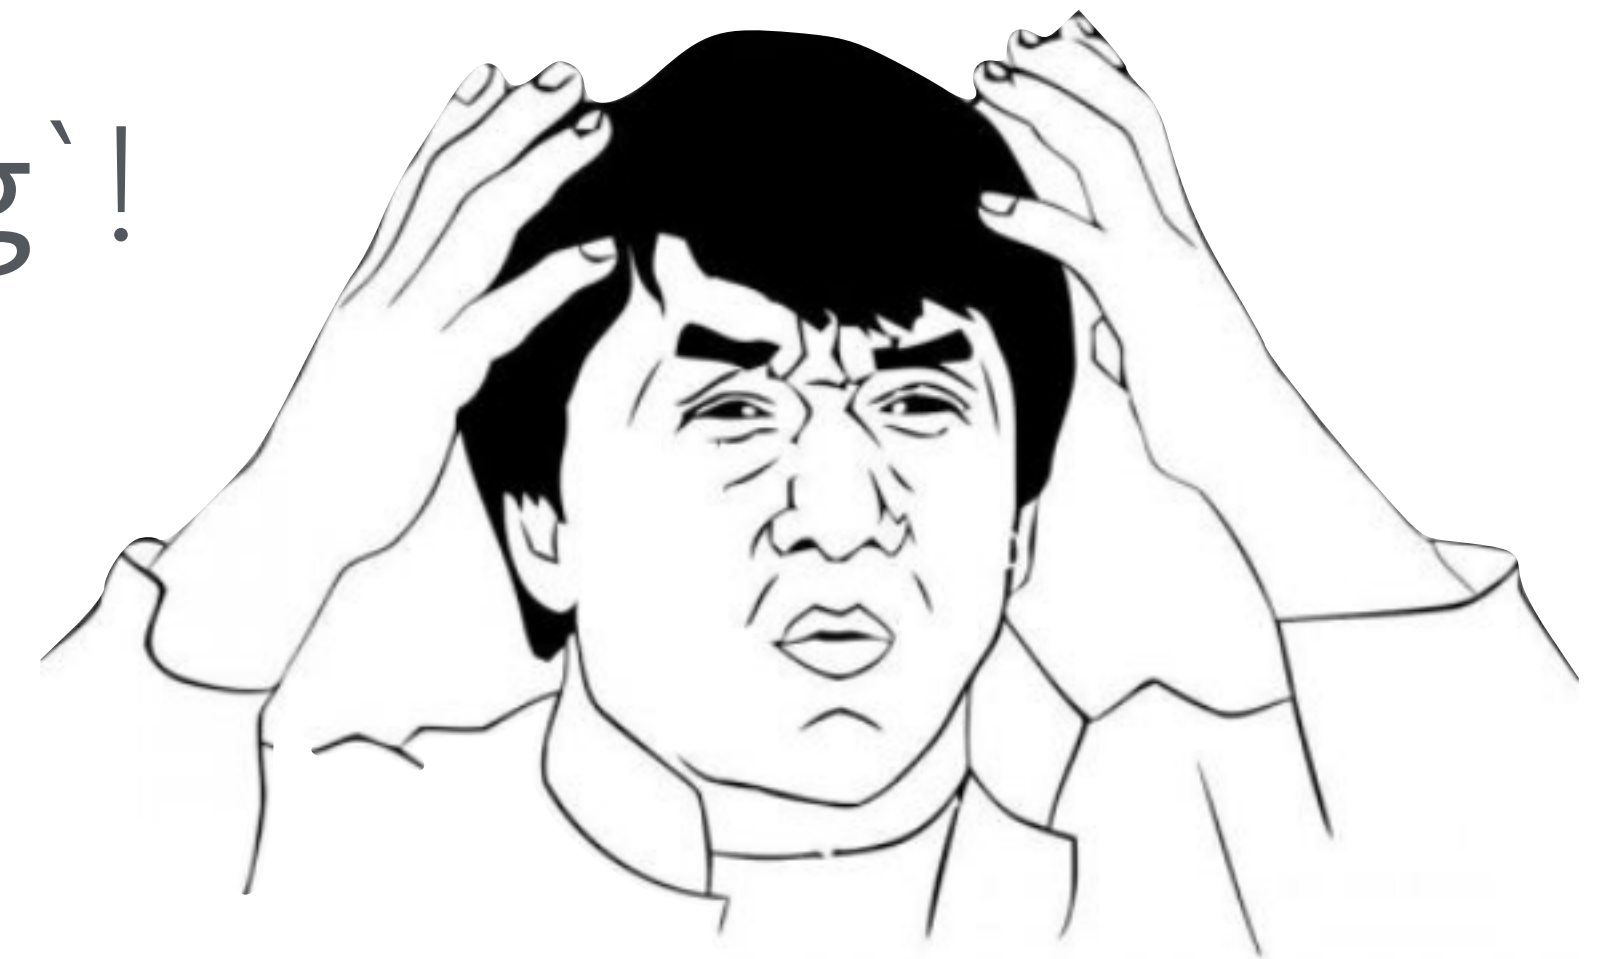

Problem #1: Magical Parameters

- Ex: ``#* @post /echo/<msg>``
- Receives a **path** parameter ``msg``
- Can also receive a **query** parameter ``msg``!
- Can also receive a **body** parameter ``msg``!

Ans #1: Clearly defined parameters
